Fly, 1722.

Of the Eclipses this Year.

THere will be five Eclipses this Year, three of the Sun, and two of the Moon, in the order following.

The first is of the Sun, on *Saturday* the 6th of *January*, a little after Eleven in the Morning, which, if the Air be clear, will not be visible at *London*.

The second is again of the Sun, on the 2d of *June* near 8 at Night; invisible also.

The third is of the Moon, on *Monday* the 18th of *June* at two in the Morning: It will be a total Eclipse, and if the Air be clear, we shall have a sight thereof.

The fourth is of the Sun, *November* the 27th, about three in the Afternoon, which, if the Air be clear, will be visible at *London*, the Sun appearing half darkned on the South side.

The fifth is of the Moon, *December* the 11th, beginning soon after two in the Afternoon, so that (if the Air be clear) we shall see the beginning, but not the end, for the Moon sets eclips'd.

The Sun's Entrance into the four Cardinal Points this Year.

HE enters *Aries* on the 9th of *March* about 8 at night, at which time the Days are equal to the Nights.

He enters *Cancer* on the Tenth of *June*, at 40 minutes past ten at Night, making our longest Day.

He enters *Libra* on *September* the 12th, at two in the Afternoon, making again equal Days and Nights all the World over.

He enters *Capricorn* the 11th of *December*, about Two in the Morning, making our shortest Day, but the longest to those who live on the other side of the Equator.

Rule

Feb, 1722.

Rules concerning Husbandry.

IF you would plant or graft, consider where the Wind is; if it be in the South, 'tis very good for that purpose; but if in the North or East, 'tis not good.

It's good to plant or graft generally the Moon encreasing in the Signs *Taurus* or *Aquarius*, in the beginning of Spring, or end of Harvest.

Plant Trees for continuance when the Moon is in *Taurus*, *Leo*, or *Aquarius*.

Fell Timber, to have it sound, in *December* or *January*, in the wane of the Moon in *Aquarius* or *Pisces*.

Prune Trees, and pull off the Moss, in *February*.

Plant Hedges, and lop Trees for Fuel, that the Heads may the sooner grow again, when the Moon is in *Aries* or *Libra*, and in her encrease.

Set young Quicksets from *September* to *March*.

Remove young Trees in the last Quarter of the Moon when she is in *Aries*, *Libra*, or *Scorpio*, and in the Month *September*, *November*, and *February*.

Set Vines in *February*, *March*, or *September*, especially the Moon in *Aries*, *Libra*, *Scorpio*, in her increase.

Set Rose Trees in the midst of *February*, the Moon encreasing.

Cut or Prune Trees in *March* or *April*, the Moon in *Taurus*, *Virgo*, or *Capricorn*.

Gather Fruit, as Apples, Pears, and the like, at the full Moon in the afternoon, the weather being fair and dry.

Cut down Hay presently after the full of the Moon.

Dung Ground to prevent growing of Weeds, the Moon decreasing.

Sow Carrot seeds about the end of *February*, or the beginning of *March*, the Moon encreasing. Also sow Onions and Leeks in *February*, or *March*, at the wane of the Moon.

Sow Cucumbers and Melons in *February*, or *March*, or *June*, in a hot fair day.

Fly, 1722.

Sow Parsley, Fennel, and Anniseed, in *February* or *March* in the full of the moon.

Sow Marjoram, Violets, Thyme, Rosemary, and Lavender in *February, March, or April*, in the increase of the moon.

Sow Gilliflowers and Wall-flowers, in *March, or April*, in the old of the moon.

Sow Hyssop and Savory in *March*, when the moon is old.

Sow double Marigolds in *February* or *March*, in the increase of the moon.

Shear Sheep at the increase of the moon.

The best time to Geld Cattle the moon being in *Aries, Sagittarius, or Capricorn*.

Of Blood-letting, and some other Physical Observations.

IN Youth let Blood from the change to the first quarter; in middle-age, from the first quarter to the full: in Elder years from the full to the last quart. in Old-age, from the last quarter to the change. But know, that under the Age of 14 and above the Age of 56 it is not good to bleed at all.

Again, in the Canicular, or Dog-days, 'tis very hurtful to take any Physick at all, unless there be great need, and indeed Necessity hath no Law; wherefore in such a case, the Disease being desperate, the Cure must be ventur'd.

Take a Purgation when the Moon is in Trine, or Sextile Aspect with Venus, decreasing in any of these three Signs, *Cancer, Scorpio, or Pisces*, and it will be sure to work the better, because when a moist Planet, in a moist Sign hath such an aspect, the humours in the Body are then stirred up and down, and so the better purged out; wherefore in this case, it cannot be amiss to prepare humours by something that is laxative, and let this be done whilst the moon is either in *Gemini, Libra, or Aquarius*.

Take a Vomit, that it may work thoroughly, when the

Moon

Fly, 1722.

Mooh is in *Aries, Taurus*, or *Capricorn*: and know that the aspects or the Moon with *Saturn*, or *Mars*, or the Moon in *Leo*, ought to be eschewed in the taking of Medicines. Finally, if necessity urge no haste, these Observations are expedient; for 'tis a plain truth, that the change of weather upon differing Aspects doth greatly change and alter mens Bodies

Bills and Obligations, One to One.
